

Model 8535

JTAG Emulator for C4x and C6000 DSP Boards

Ordering Information

Model	Description
8535	JTAG Emulator for C4x and C6000 DSP Boards
Options:	
-001	ISA Bus PC interface
-003	Parallel port PC interface
-005	PCI Bus PC interface

Pentek Model 8535 supports debugging through the JTAG emulator ports on Pentek C40 and C6000 DSP products, usually located on or just behind the front panels.

Options -001 and -005 include a circuit board for the workstation and an emulator pod with a JTAG cable. Option -003 includes

an emulator pod with a built-in parallel port interface that allows a direct connection to the PC's printer port. Available software, if purchased, includes the TI Code Composer for the C40 and Code Composer Studio for the C6000. Supported workstations include PCs running Windows.
